

Project Design Phase-I - Solution Fit Template

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS - Urban households - Apartment residents - Small and medium businesses - Educational institutions - Environmentally conscious consumers - Utility companies (secondary segment)	6. CUSTOMER CONSTRAINTS CC - Limited technical knowledge - Budget constraints - Resistance to new technology - Privacy concerns regarding data usage - Compatibility with existing electrical systems	5. AVAILABLE SOLUTIONS AS - Traditional electricity meters - Monthly paper/online billing statements - Basic smart meters (without analytics) - Manual tracking through spreadsheets - Energy-efficient appliances	Explore AS, differen
	2. JOBS-TO-BE-DONE / PROBLEMS - Monitor monthly electricity consumption - Reduce high electricity bills - Identify high energy-consuming appliances - Avoid peak-hour overuse - Track and control energy usage remotely - Adopt sustainable energy practices	9. PROBLEM ROOT CAUSE RC - Lack of real-time visibility of electricity usage - Limited awareness of energy-saving practices - No predictive insights on future consumption - Inefficient appliances and unmanaged usage habits	7. BEHAVIOUR BE - Consumers check electricity bill only once a month - Limited monitoring of daily usage - Overuse during peak hours - Reactive approach instead of preventive management - Gradual shift toward smart home devices	

3. TRIGGERS TR • Sudden increase in electricity bill • Power shortages or load shedding • Government energy-saving campaigns • Installation of new high-power appliances • Rising environmental awareness	10. YOUR SOLUTION SL • Tracks real-time energy consumption • Provides AI-based usage insights and forecasting • Sends peak usage alerts and bill predictions • Suggests personalized energy-saving tips • Integrates with renewable sources like solar panels • Offers a user-friendly mobile and web interface	8. CHANNELS of BEHAVIOUR CH Online: • Mobile applications • Web dashboards • Email/SMS alerts • Social media awareness campaigns Offline: • Utility service centers • Retail electrical appliance stores • Community awareness programs • Printed electricity bills
4. EMOTIONS: BEFORE / AFTER EM Before: • Confusion about bill calculations • Frustration over high costs • Anxiety about overconsumption • Lack of control After: • Confidence in managing energy usage • Satisfaction from reduced bills • Awareness and responsibility • Peace of mind
